Subject: Thanks for your help today . . .

. . . on the findings from initial analysis of samples from the 11 Dimock, Pa., homes' water wells. OGJ has posted my story online. Here's a link: <http://www.ogj.com/articles/2012/03/epa-finds-no-health-concern-in-first-dimock-pa-water-well-samples.html>

I hope I can contact you in the future. Please send me any updates on this or other matters relating to your office's work on environmental questions associated with unconventional oil and gas resource development in Pennsylvania and elsewhere in Region 3.

With best wishes,
Nick Snow
